Step2. Connect the MDCL-705i and PC to the same switch in the LAN

Hub/Switch

Power supply
(+10 ~ +48V_{DC})

2 Creating User Account

Before starting this configuration, the MDCL-705i needs be connected to your network and powered on. Note down the IP address of your computer for restoring it later.

The factory default settings:

Item	Default
IP Address	192.168.255.1
Subnet Mask	255.255.0.0
Gateway	192.168.0.1

Step1. Assign an IP address in the range of 192.168.255.2 to 192.168.255.253 to your computer.

NOTE: Details on how to change the IP address on your computer depend upon the type architecture and operating system you are using. Use the computer Help and Support functionality to search for "IP Addressing".

Step2. Enter the default IP address of the MDCL-705i (http://192.168.255.1) into your browser's address bar and press "Enter".

Step3. Create your account (for the first time login)
User name and password must be at least four characters.
(A-Z, a-z, 0-9, case-sensitive and ".", "-", "_", "@"symbols)
